

Polymita: ezt is megvette a Red Hat

A Red Hat idén bevásárlás kedvében van, az ESB és MQ megoldásokban utazó [FuseSource megvétele](#) után két hónappal egy BPM céget is magáévá tett, ahogy ezt a [Polymita weboldalán](#) jelenleg olvashatjuk:

Polymita and Red Hat Join Forces!

Polymita and Red Hat are excited to announce that Red Hat has acquired the technology developed by Polymita. Today marks an important milestone as we join forces behind a singular vision—to create and deliver the best technologies and services in the world. Here at Red Hat, we're excited about the potential that this news brings.

Polymita has long been an innovator in empowering enterprise business users to take control of their destinies through simple and agile business process management. The strength and maturity of its technologies are a testament of its dedication to excellence.

Red Hat's experience in enterprise transformation and the depth of our middleware product portfolio have catapulted us to a unique position of leadership in the software industry. Together, we stand better equipped and ready to deliver some of the industry's most valuable and innovative open source solutions.

Over the next several months, Red Hat plans to develop an integrated product roadmap, leveraging Polymita technologies as part of the Red Hat JBoss Middleware portfolio.

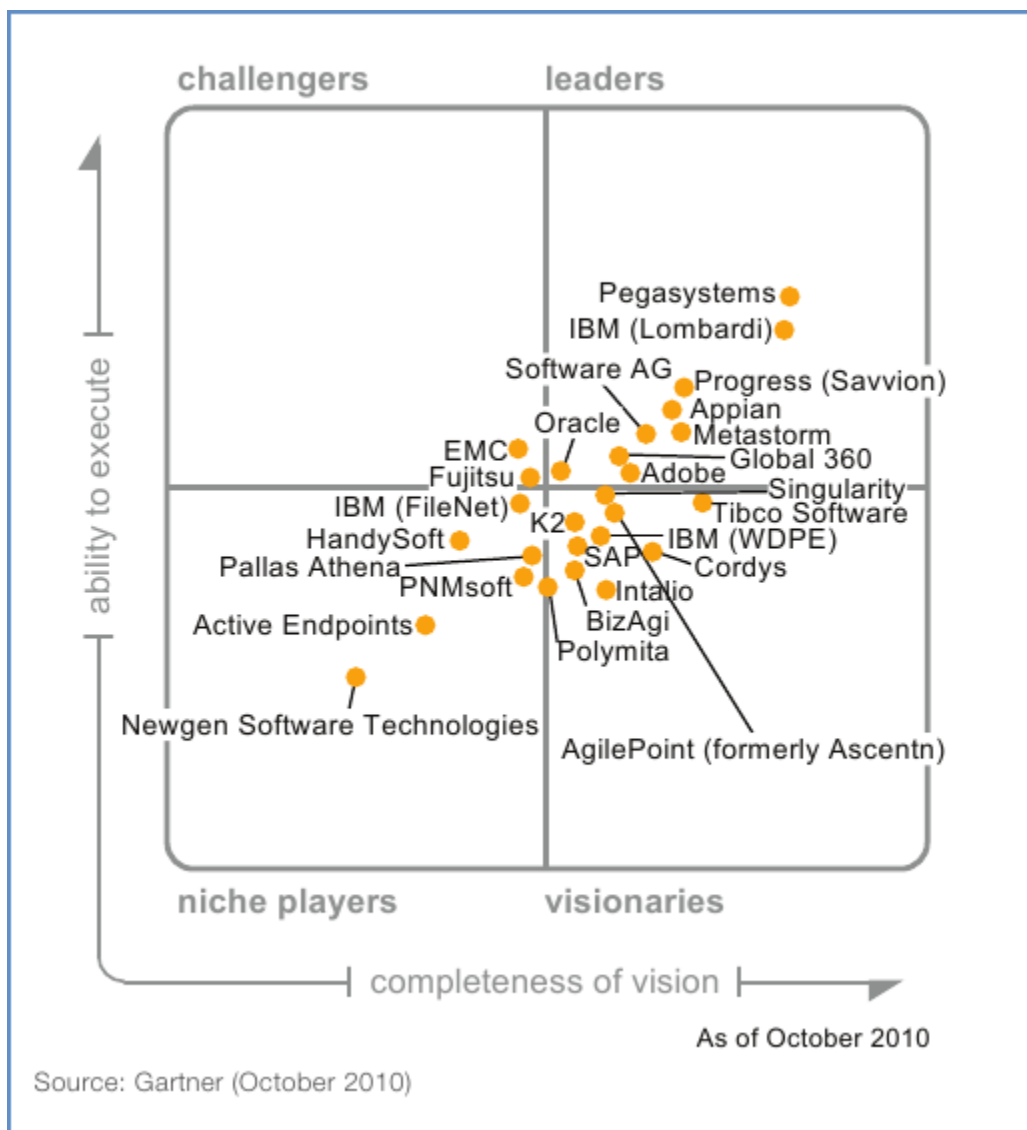

Customers with an active support contract with Polymita may continue to access support services. Contact information for technical support is unchanged, and available at the following URL: <http://www.polymita.com/en/TechnicalSupport.html>. Support cases can continue to be filed here: http://support.polymita.com/login_page.php.

For more information about the Red Hat acquisition of Polymita's technology, please see the press release here: <http://www.redhat.com>.

A felvásárlás nagyjából megerősíti, hogy a Red Hat minden bizonnyal felhagy a jelenlegi JBossESB (SOA-P) platformjának további fejlesztésével, mivel ezen termékben a *mediation flow* alapját a jBPM adta, illetve a JBossESB/SOA-P tartalmazott egy [Seam és jBPM](#) alapú megoldást is.

A Polymita egyike azon BPM megoldásoknak, amely – ha nem is a jobb felső négyzetben, de szerepel a Gartner Magic Quadrant elemzésében, bár a vezető megoldásoktól még távol van (Pegasystems és Lombardi):

A Red Hat [nem is titkolja](#), hogy a felvásárlás célja a BPM területen való megkapaszkodás, bár a vezet pozícióra való törekvés egyelőre ers kijelentésnek tnik:

The acquired Polymita technology brings complementary BPM capabilities that are designed to improve the productivity of business users. The combination of JBoss Enterprise BRMS with Polymita technology helps position Red Hat as a leading vendor in the BPM marketplace.

Mit is tud a Polymita?
