

Wildfly maven plugin

Sziasztok!

Nemrég kezdtem foglalkozni az erraiframework-vel, szeretném megoldani ha gwt debug módja wildfly alapokon menne, de a maven-t is csak most tanulom és valahogy nem sikerült össze hoznom hogy az <https://github.com/errai/errai-tutorial/blob/master/pom.xml> -ban lecseréljem a jboss server wildfly-ra... 😞

Nem tudom mit rontok el de valahogy nem akar menni...

amikor el akarom indítani (mvn clean gwt:debug -X)

akkor a végen ezt a hibát kapom:

```

[INFO] Configured Artifact: org.wildfly.plugins:wildfly-maven-plugin:1.0.1.Final:zip
