

Server group based deploy on Wildfly

Upload the new version of the war (or ear) to the content repository of Wildfly:

```
deploy /info/gacivs/gacivs-backend-dao-services/0.0.23-SNAPSHOT/gacivs-backend-dao-services-0.0.23-20150826.223220-18.war --name=gacivs-backend-dao-services-0.0.23-20150826.223220-18.war --runtime-name=gacivs-backend-services-0.0.23-SNAPSHOT.war --disabled
```

Undeploy and remove the deployed war (or ear) from the first server group:

```
/server-group=DC01-server-group/deployment=gacivs-backend-dao-services-0.0.23-20150826.221418-17.war:undeploy  
/server-group=DC01-server-group/deployment=gacivs-backend-dao-services-0.0.23-20150826.221418-17.war:remove
```

Add and deploy the new war (or ear) on the first server group:

```
/server-group=DC01-server-group/deployment=gacivs-backend-dao-services-0.0.23-20150826.223220-18.war:add  
/server-group=DC01-server-group/deployment=gacivs-backend-dao-services-0.0.23-20150826.223220-18.war:deploy
```

Check the deployment and repeat on the other server groups.
